Running title

Dewlap coloration in *Anolis sagrei*.

Acknowledgements

Collection permission was granted by the Bahamas Environment, Science and Technology Commission, the Bahamas National Trust, the Bahamas Ministry of Agriculture, and the Cayman Islands Department of the Environment. The authors thank Sofia Prado-Irwin, Pavitra Muralidhar, Nicholas Herrmann, Richard E. Glor, Alberto R. Puente-Rolón, Kevin Aviles-Rodriguez, Kristin Winchell, Jason Fredette, Quayn Quach, Wendy Jesse, Inbar Maayan, Alexis Harrison and Melissa Kemp for assistance in the field and Pratik Gupte, Max Lambert and James Stroud for helpful discussions. This project was made possible through the support of a grant from the John Templeton Foundation (to JBL). The opinions expressed in this publication are those of the author(s) and do not necessarily reflect the views of the John Templeton Foundation. Additional funding for this work was provided by NSF DEB #1927194 (to JBL and AJG), NSF DEB #1500761 (to AJG), NSF DBI #1609284 (to CMD), and a Harvard Museum of Comparative Zoology Putnam Expedition Grant (to RGR).

Author Contributions

CMD, RGR, AJG and JBL designed the study. CMD, RGR and AJG organized the fieldwork and collected the data. RS performed the analyses and wrote the manuscript, under the supervision of CMD, RGR and AJG. All authors contributed to revisions of the manuscript. JBL provided the resources.

The authors have no conflict of interest to declare.
